

ARTICULATING STORAGE TRAY KEYBOARD

Articulating Keyboard with Dual Mouse Pads

Lifting Off Mouse Pads Exposes Storage Trays

Dual mouse pads accommodate both right and left handed users.

Mouse pads are made from a material that is textured on one side for better mouse control and smooth on the other for use as a writing surface.

Mouse pads easily removed using convenient built-in finger pulls.

Lifting off the mouse pads exposes storage trays that are sculpted into the surface.

Constructed from a material that is many times more impact resistant than standard laminates, these durable keyboard trays pass the test of time.

The BIFMA rated articulating keyboard mechanism adjusts to distance, rotation, height and tilt.

Trays are available in a number of colors and patterns.
