

Emergency Management

For almost three decades, our business has revolved around designing and building “Starship” style control rooms for the private sector and federal, state and local government agencies. Since 9-11, our main focus has shifted to emergency management centers. Having been in the industry for so many years, we understand the needs and idiosyncrasies of each environment and have created cost-effective easy to acquire packages.

The most pressing issue in emergency management is saving lives!

Creating a user friendly environment that allows the responders to interact with each other efficiently is the first step. Americon's Communicator furniture solutions create unobstructed line-of-site eye contact.

Why Americon?

First you need a budget! Americon is a multi-faceted company offering three distinct assets: Design Services, Technical Furniture Manufacturing and Audio-visual Integration. We are in a unique position because all of our departments collaborate with the client on the project. The ability to sit face to face and discuss cause and affect issues internally speeds the process tremendously. The faster we get answers back to the client, the faster the client can react. Providing a total solution circumvents many of the normal bureaucratic hurdles and red tape that are created when a different contractor performs each piece of the puzzle.

Why are there different packaged solutions?

There are very large federal and state centers for monitoring the many aspect of a disaster. Usually, multiple agencies come together to resolve problems and implement solutions based on the situation. The majority of the time, these rooms are unoccupied. Smaller emergency management centers for police, fire and transportation are spread all across the country and are considered 24 x 7 environments. Their needs may be similar in basic function but they may have very different ergonomic and audiovisual needs. The furniture, as an example, needs to support long term occupation on a daily basis.

COMMUNICATOR: Designed for use in emergency operation centers

AMERICON COMMUNICATOR WORKSTATIONS ARE MANUFACTURED TO MEET AND EXCEED ANSI-BIFMA STANDARDS. THE "STATE OF THE ART" MATERIALS USED IN MANUFACTURING THESE PRODUCTS ARE MANY TIMES MORE RESISTANT TO IMPACT THAN STANDARD HIGH PRESSURE LAMINATES AND GIVE US THE UNIQUE ABILITY TO BUILD A FREEFORMED PRODUCT WITH OUT USING SELF-EDGING OR BUMPER MOLDING.

WE OFFER THREE VERSIONS OF THE BASIC COMMUNICATOR WORKSTATION:

- STANDARD COMMUNICATOR FOR LAPTOPS
- COMMUNICATOR WITH MONITOR WELL
- COMMUNICATOR WITH FLIP-PANEL OPTION

WE OFFER MANY OPTIONAL ACCESSORIES:

- ARTICULATING KEYBOARD TRAYS
- INTEGRATED STORAGE CABINETS
- TILT-UP POWER & COMMUNICATION PORTS
- DOCKING STATION SHELVES
- SEGREGATED CABLE MANAGEMENT
- CPU TRAYS
- LOCKING CASTERS

COMMUNICATORS WORKSTATIONS COME IN MANY SIZES FROM 30" WIDE TO 96" AND ARE ALWAYS MODULAR. THEY CAN BE USED TO MAKE A V-SHAPED CONFIGURATION WITH A COORDINATOR AT THE HEAD OF THE TABLE; SET SIDE BY SIDE IN A CLASSROOM SETTING; MADE INTO A MULTI-PURPOSE CONFERENCE TABLE WITH A COORDINATOR ON EITHER END OR MADE IN TO A U-SHAPE. A SIMPLE CONFERENCE ROOM CAN QUICKLY BE TRANSFORMED INTO AN EOC OR WAR ROOM WITH JUST A FLIP OF THE LID.

COORDINATOR WORKSTATIONS ARE CUSTOM DESIGNED TO FIT VARIOUS APPLICATIONS. THE ANGLE OF THE COORDINATOR DESK DETERMINES THE ANGLE OF THE V-SHAPE AND THE LENGTH DETERMINES THE WIDTH OF THE CONFIGURATION. THE BACK

TO BACK CONFERENCE TABLE VERSION HAS A BUILT IN CPU CAVITY WITH INSPECTION DOORS. KEYBOARDS AND MICE CAN BE STORED ON ARTICULATING TRAYS OR ACRYLIC HOLDERS ON THE REAR SIDE OF THE INSPECTION DOORS. A SINGLE SECTION CAN HAVE MORE THAN ONE FLIP-PANEL OR HOLD MULTIPLE MONITORS.

THE COMMUNICATOR WITH A MONITOR WELL HAS ADJUSTABLE SHELVING TO LOWER THE MONITOR AND ENHANCE LINE OF SIGHT COMMUNICATION. OUR UNIQUE FLIP-PANEL VERSION ALSO LOWERS THE MONITOR INTO THE WORKSTATION AT AN ERGONOMIC ANGLE BUT ADDS THE BENEFIT OF TRANSFORMING THE WORKSTATION INTO A TRADITIONAL CONFERENCE TABLE..

STANDARD FEATURES OF ALL COMMUNICATOR WORKSTATIONS:

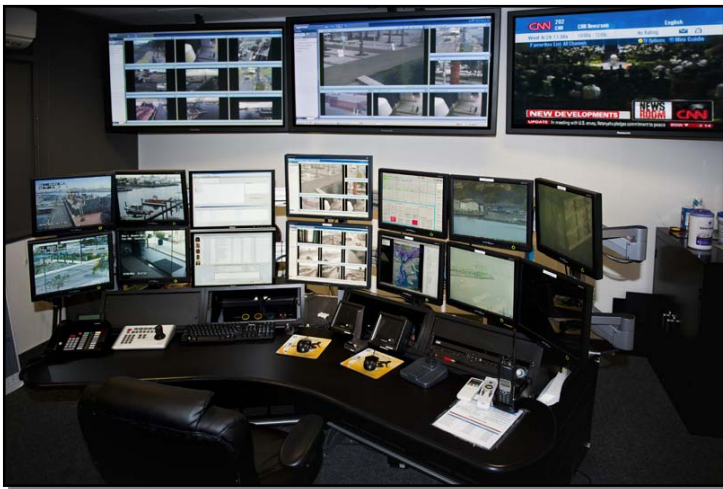

- CABLE MANAGEMENT
- PASSTHROUGH WIRE GROMMETS
- ADJUSTABLE LEVELING GLIDES
- JOINING HARDWARE
- MULTIPLE COLOR SELECTION
- THREE YEAR LIMITED WARRANTY

ACCOMMODATES MONITORS IN STANDARD OR WIDESCREEN FORMAT

What is Visionmaster?

The Visionmaster is our answer to a self-contained video wall system. Incorporated into it as standard features are audiovisual cabinetry; DLP Rear-projection cubes or ULTRA-THIN mullion LCD panels; a video wall processor that converts the video array into a single palette, integrated sound system, along with an optional control system. The Visionmaster can simultaneously show running video (live TV, video-conference, cameras, satellite, cable and DVD); stand alone computer video and network provided applications.

We also manufacture dispatch and security stations!

Our slatwall dispatch and security stations include monitor mounts, radio turrets, sit/stand hydraulic lifts, CPU storage and many other features. They function equally well in fire and police dispatch or in security operation centers.
