

## Visionmaster Video Walls

Rear Projection DLP Video Wall

Visionmaster is Americon's all-inclusive video wall solution. It includes an array of monitors, a video wall processor that turns the array into a single palette and video wall cabinetry for mounting the monitors and storing electronic peripherals.

Thin-mullion LCD Panels

Visionmaster video walls can be ordered with either rear-projection cubes or thin-mullion LCD panels.

Many accessories are available :

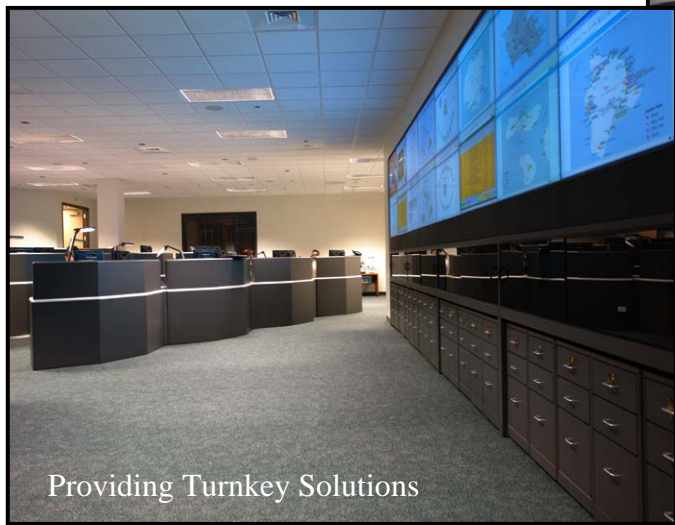

- Control System
- Sound System
- Computer Storage
- Remote Source Interface Kits
- Rackmount Storage
- Storage Shelving
- Mobile Pedestal Storage
- Matching Peripheral Cabinetry
- Matching Workstations
- Flip Panel Conference Tables
- Engraved logos

# Visionmaster LCD

LCD video walls are only 12" deep and feature vertically oriented racks, power strips, CPU storage, exhaust fans and front access doors.

The video wall processor combines the monitors into a single palette. Although images can be aligned with the screens, they can be placed anywhere.

Providing Turnkey Solutions

Computer images, broadcast video, DVD players, cable boxes, cameras and network applications can all be shown simultaneously on the palette in scalable windows. The video wall processor is capable of saving numerous layouts that can be recalled through hot keys on its keyboard or using a control system.

Visionmaster video walls are expandable both vertically and horizontally. There are few limitations to how wide or how tall the video wall can be. Many monitor sizes are available in both rear-projection DLP which are glass against glass and ultra-thin mullion LCD flat panel monitors where image gap screen to screen is only 1/4".

Americon is one of the premiere manufacturers of technical furniture in the U.S. As such, we provide matching workstation solutions and innovative cabinetry options. Note the garage created under the video wall for mobile pedestals and cockpit style workstations in the above image.

Extended warranties and service contracts are available for all Visionmaster products.
